

School Guide

Educational Goals

Independence

To be a human being able to be alone,
Doing, thinking, making, interacting, comparing, and finding, we have to aim to disseminate our ideas, deepen them, change ourselves, and embrace the power of independence.

Acceptance

To be a human being who can accept others,
Holding judgement on others until, getting acquainted, and finding people's best qualities, we have to respect others good points, encourage them where they are missing, and aim to spread a mindset of accepting others.

Cooperation

To be a human being who can help and work with others.
We strive to combine collaboration and decision making whilst maintaining guidance. We hope to guarantee fulfillment, by accomplishing our responsibilities and moving forward to help each other.

Education policy

At our school, in “cooperative classrooms”, we aim to enrich a student with a viewpoint of collaboration and participation with a school educational goal for “Independence, Acceptance, Cooperation”

In an atmosphere that allows students to mutually recognize and help each other, we aim to sufficiently increase each person's individuality and ability.

In order to improve school life, with the student council, we aim to build a student who can deliberate in discussions until all members are satisfied and make a self judgement.

With promoting education aimed at integrating the elementary and secondary, whilst actively collaborating with university, we aim to nurture students who can learn creatively with their fellow classmates.
